Funding Partners:	IRCS, NHQs, IFRC
Report Prepared by:	SriBiswajit Das
Reporting Date:	2016-05-30
Report Verified by:	SriBiplabSuklabaidya

Background

Since Tripura is situated in seismic zone V, it is essential that we get ourselves prepared to manage earthquake & any other disasters. For efficient management of disasters we need trained & skilled volunteers. As such training of volunteers is an important item in the Disaster Management. Indian Red Cross Society, NHQs has identified a minimum set of skills which its volunteers must possess in order to be first responder to a variety of emergencies. This has led to development of the concept of First Medical Responders (FMR). The Indian Red Cross Society, with the support of State Red Cross Branches and its International partners, aims at developing a cadre of Certified First Medical Responders at district level through a series of training programmes and enhancing the capacity of communities to respond to emergency situation. In view of developing this set of skills Indian Red Cross Society, Tripura State Branch is conducting Mock Drills on management of emergency situations such as Earthquake, Fire hazard, etc in schools and at community level under DM programme 2016.

Objectives/Purpose:

1. Preparing the community people/ school students to manage disaster situations. 2. To provide basic knowledge & concept of CFMR and their role & responsibilities during & after disaster. 3. To provide basic knowledge on disaster preparedness in the community. 4. To provide detailed knowledge about First Aid in Emergencies, Basic Life Support (CPR) & Safe Handling the Bandaging, etc 5. Increasing community disaster awareness.

Methodology

1. The school students/ community people are explained the basic pros and cons of a simulated disaster situation. 2. They are given practical classes on first aid, bandaging, search and rescue, transportation of casualties, tracing, volunteer management in crisis situation and similar subjects.

Outcomes:

1. In practical session every participant practiced and demonstrated methods of bandaging, Safe handling of casualties and Basic Life Support (CPR) techniques with proper attention & seriousness. 2. The students/community people showed increased confidence in managing disaster situations. 3. It can be expected that the school students/ community people would be able to handle the emergency situation in a better and more efficient way.

Participants Experiences:

It was a very good experience as it was my first time. I loved participating in the training programme and would love to attend the other training programmes that will be held in the future.

Volunteer Experiences:

It was a very good experience as it was my first time. I loved participating in the training programme and would love to attend the other training programmes that will be held in the future.
